

**BELKIN  
CLERESTORY  
WINDOWS**

There will be a period when secretive sarcococca flowers emit a dense perfume from under dark green leaves.

Bopping bushtits will dance like tiny boxers as they prepare warm nests of moss, spiderwebs and grass.

Turkey tails will emerge from rotting logs ready to repel the mist. Stacked frills flash their edges in the gloom.

Moss colonies will huddle together cupping dew in anticipation of drought.

In an unprecedented turn, coyote's three paws will gain purchase balancing the probability of another year.

For a period, crocuses will invite bees to their pollen with waves of luminous yellow and purple.

Prepare for fathomless puddles that seep into boots and wick up socks. Toes may shrivel and pucker.

Clumps of moss will be flushed from the cracks forming minute islands in an expanse of concrete.

Geese will uncoil their necks to reach for vivid new shoots. Leaving a light down as they nip and swallow.

Cherry blossoms will experience a rapid rise and fall. Stripped from trees to commune in nearby grates.

There will be periods when pupils dilate. Watch for wincing and pulsing green orbs behind eyelids.

Writhing up through the cracks, buttercup will seek warmth light.

Squirrels will eavesdrop under benches while furtively feeling for last year's acorns.

Night air will fill with ultrasonic calls. Little brown bats will perform aerial stunts to snatch winged snacks.

Expect seedy grit to accumulate in teeth, as warm blackberries burst on the tongue.

There will be periods when low lying shrubs fill with crinkly cellophane. Appearing like unnatural flowers.

Pots of tomatoes will ripen in the reflection of metal too hot to touch.

Expect a period where breath becomes difficult limbs heavy, and the mind grows confused.

**ARCHIVE WINDOW**

Crows will ecstatically scatter tufts of grass. Anticipate turf to be turned like giant jelly rolls.

**CIRS WINDOWS**

Be cautious, firm ground  
will liquify.

For extended  
stretches there will  
be a sinking sensation  
as mud squelches  
underfoot.

Hazy blooms of algal  
scum will obscure pond  
bottoms for weeks at a time.

Sturdy reeds will ascend  
from the  
brittle remnants  
of last year's growth.  
Hovering above  
fetid muck.

Horse chestnuts  
will separate from  
their spiny shells  
in expectation  
of nurturing soil.

Warming cedar mulch will  
emanate  
medicinal scented vapour  
to float on elusive currents.

Fireweed will sway  
and hum with the  
vibration of  
countless wings.

Blackberry vines  
will travel along  
forest edges  
snagging those that  
pass with hooked  
thorns.

Seeds hang heavy slowly  
pulling grassy stems to  
the ground  
while searching out a  
damp place to rest.

Expect a visitation  
from underground.  
As mushroom caps  
break through  
clouds of spores  
are imminent.
